BASIC ALBUM

Cover

Your basic album comes in an 11x14 landscape size and includes a cover from the basic palette (basic palette includes: leatherettes, linens, shimmers and buckrams).

Spreads

20 pages - 10 spreads

Design

Your photographer will design and prepare your album for you. You have the option of selecting your images and mats yourself or letting your photographer choose them for you.

Changes

You will view your "proof" of your album in an online gallery. At that time, you will be allowed to make as many changes as you see fit and comment on the album directly on the website. It is YOUR responsibility to proof your album closely. You are required to electronically finalize each of the spreads. Mistakes cannot be changed after an album is sent to press.

DETAILED DESCRIPTIONS OF UPGRADES

*View <http://www.finaonline.com> (Then click on PRODUCTS and then MATTED ALBUMS and BOOKBOUND ART) for samples

Photo Montage - The photo is laminated for protection and then mounted onto the front cover of the album. The spine and back cover are bound in black leather unless another material has been specified (available in full and half covers). Available in Canvas, Silk or Lustre Print

Two Tones - Two Tone album covers allow you to get really creative utilising the full range of Seldex album materials. Select a material for the spine and a different one for the front and back cover and create a really different look and feel for every album. Try leather with leather, leather with brocade, leather with linen - the choice is endless. Just remember it's best to stick with leather or leatherette for the spine as this will wear best.

Image Print - Your image is printed onto the surface of either acrylic or aluminium. Imageprint acrylic covers will be transparent and a white fly leaf will be reflected through the cover.

Metals - Metal albums come either plain or with a standard 2½ x 3½ vertical cut-out in the front cover. Etching is available on Apollo metal, Aluminium & Brushed metal.

Metal Inlays - A metal inlay is designed to sit flush on the cover of the album. The spine & back cover is bound with a leatherette. A metal panel sits on top of the cover and has a leatherette binding on the spine and cover.

Perspex - Perspex covers are a hot option. A beautiful metallic print from The Edge lab in Australia is permanently and flawlessly mounted to a Plexiglas panel. The spine and back cover are bound in elegant black leather. Perspex covers are the best quality acrylic covers available. They truly are a step above the competition.

Timber - The timber will appear on both the front and back of the album. Beautiful for rustic weddings. The best materials to select for the spine will be from the leather, leatherette or outback leather collections.

Wild Animalia - These exquisite decorative skins have been a favorite in Europe for over 20 years. Without being over-the-top you could add a little 'magic' to your albums with the addition of one of these fantastic leatherettes.

Avantegarde - Prestigious Avantegard leathers feature modern patterns embossed and printed on top grain leather. Imported direct from Italy, Avantegard leathers have minimal surface marking and scarring. Ideal for brides wanting a beautiful, designer original wedding album that is both unique and stunning.

Christina Re Series

CRISTINA RE is one of Australia's leading designers and her work is recognised by her fashionable decorative patterns featured on beautiful wedding stationery and lifestyle products. Influenced by her classical European background and her extensive travels around the world, Cristina's award winning designs have a celebrity following and are sought after by stylists and editors around the world. This beautiful range of album covers are available on all our Bookbound Art Albums and feature exquisite patterns and embellishments unlike anything available on today's wedding albums. Cristina Re album covers are available in her unique black or white leather only. Each album has an embossed fly leaf with Our Wedding and comes packaged in a custom box designed to match the album cover.
